

Speaker

Juergen Mairhofer, PhD., is CEO and Co-founder of enGenes Biotech.

He holds a PhD degree in Biotechnology from the University of Natural Resources and Life Sciences, Vienna (BOKU) where he developed an antibiotic resistance marker-free plasmid DNA production system for gene therapeutic applications in collaboration with a world-leading pharma company. Before founding enGenes Biotech he was as a post-doc at the Austrian Centre for Industrial Biotechnology (ACIB) where he was working at the intersection of genetic- and bioprocess-engineering. He is author of more than 20 scientific publications and book chapters. His company enGenes Biotech has developed a unique approach for the growth-decoupled production of recombinant proteins and DNA
